

BRANDED RETAIL FIXTURES

Customisable Options

WALL MOUNTED SUNGLASS DISPLAY - 80 PIECE

Suited to an inline wall display, this piece is available as a plywood finish, stained to suit your brand. Either illuminated or non illuminated signage can be mounted to the header and locking or open displays can be utilised.

Complete with lockable storage to the base and integrated mirrors to both sides, this piece is flat packed to a parcel not much larger than the base cube, to ensure easy distribution and simple in store assembly.

FREESTANDING SUNGLASS DISPLAY + STORAGE - 30 PIECE

Self contained unit for a heavy duty shopping environment. This piece includes integrated storage and concealed mirror/signage options on all sides. These components can be customised to suit your brand and capacity planning.

Simple branding can be executed on all sides of this display, along with illuminated panels and power routing to the top or base pending application.

COUNTERTOP HANG SELL DISPLAY - ROTATING

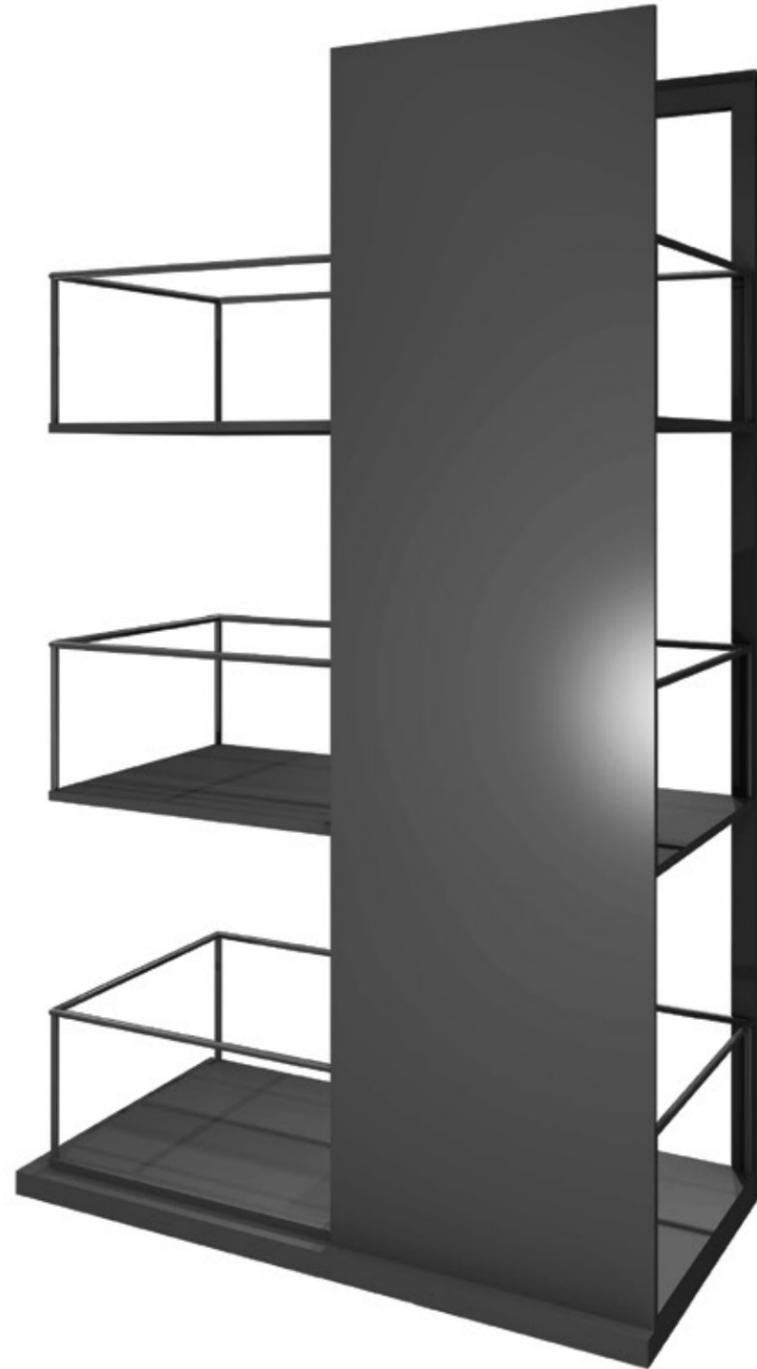

The perfect table top or counter top spinner, suited to small items that are generally hang sell. Using a mesh backing there is infinite merchandising possibilities on all four sides, allowing for the continual feature of merchandise in key areas.

On a rotating base, this unit comes complete and boxed suitable for delivery direct to store. Simple branding can be added too the header or on top of the unit for even more presence in store.

Customisable in colour and size, with storage to the base or a stand to bring up to counter height.

FREESTANDING 3 SHELF DISPLAY WITH IMAGE

Key merchandising opportunities can be realised with this display, allowing for bulky or boxed product to be held on mass with key signage or graphic messages to the leading side.

Integrated pricing holders or product information can be mounted to the individual shelves, to assist with simple customer navigation.

Available with magnetic signage or slim line light box, floor mounted or on wheels, this unit is extremely present on the floor and effective.

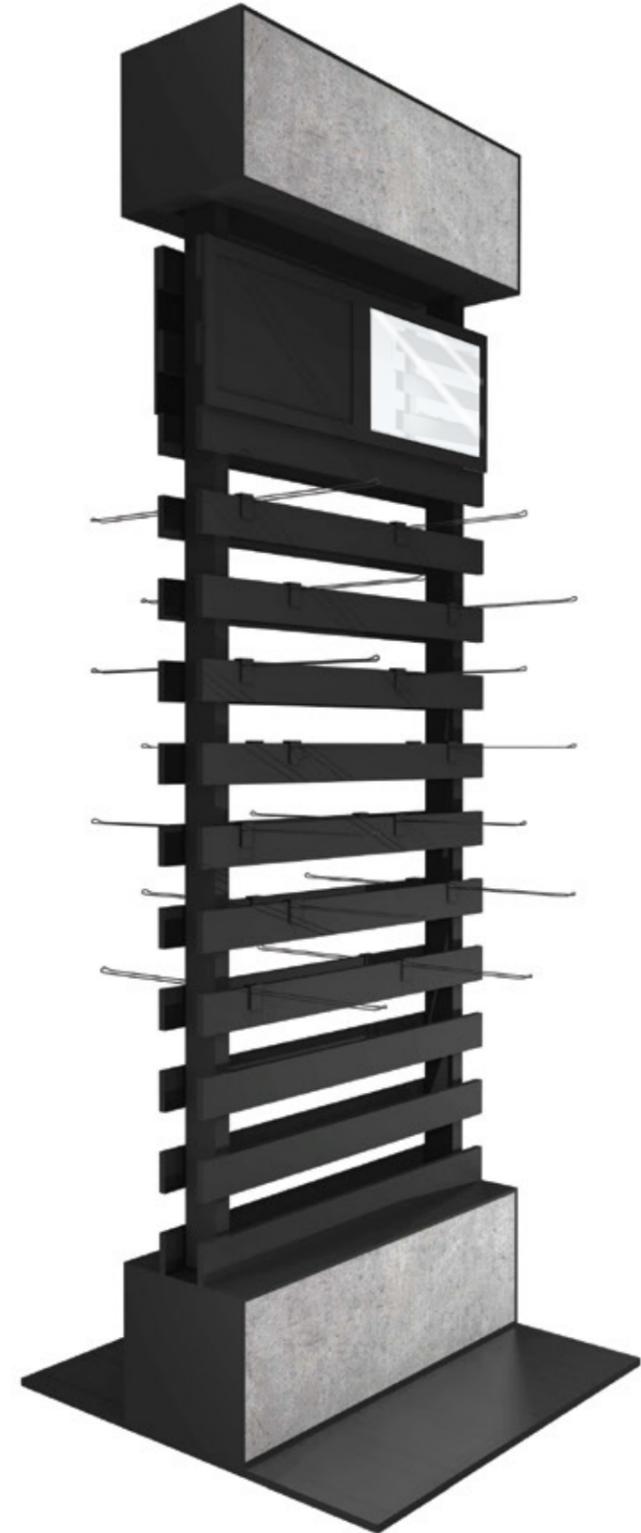

DUMP BIN WITH HEADER DISPLAY

Simple in its design and flat packable, this unit was originally designed for socks where half a dozen sku's are merchandised on the face with key branding, whilst the volume stock is dropped in a dump bin style base.

Stable and durable, this piece is a cost effective way to merchandise on mass.

PRODUCT DISPLAY WITH TESTING STATION

A double sided display that caters to Consumer Electronics, volume merchandising to the base and a dedicated display or testing area can be complimented with infographics on the product, a digital screen or touch panel, there is also an additional brand header that has presence on both sides.

Customisable in colour, size, merchandising capacity etc, this unit is packed relatively flat with the base and the header removable for transport.
